ASX / Media Announcement

20 December 2018

## Flow Testing Commences at Brockham Oil Field

### Weald Basin, onshore UK

Doriemus plc (ASX: DOR) ("**Doriemus**" or the "**Company**"), advises that the flow testing programme on the targeted pay zone in the Kimmeridge layers of the BR-X4Z well at its Brockham Oil Field, has now commenced.

Although the flow testing at Brockham has commenced, the Operator (Angus Energy Plc) have advised the work-over rig team will be taking a holiday break over the Christmas and New Year period and hence the long-term flow testing programme at Brockham is scheduled to be temporarily suspended over the Christmas and New Year holiday break. Flow testing operations are scheduled to stop from 23 December 2018 and are estimated to recommence around the 7 January 2019.

Brockham is located about 6km north-west of the Company's Horse Hill oil discovery (Refer Figure 1), which has been flowing oil steadily as part of its extended well testing ("EWT") programme. Refer to Doriemus announcements for the latest details of the EWT at Horse Hill.

Doriemus has NOT been advised by the operator of Horse Hill if flow testing operations are going to be shut down over the Christmas and New Year break.

The Company will provide analytical updates of the Brockham and Horse Hill flow testing programmes as they progress in due course.

### David Lenigas, Doriemus's Executive Chairman, commented;

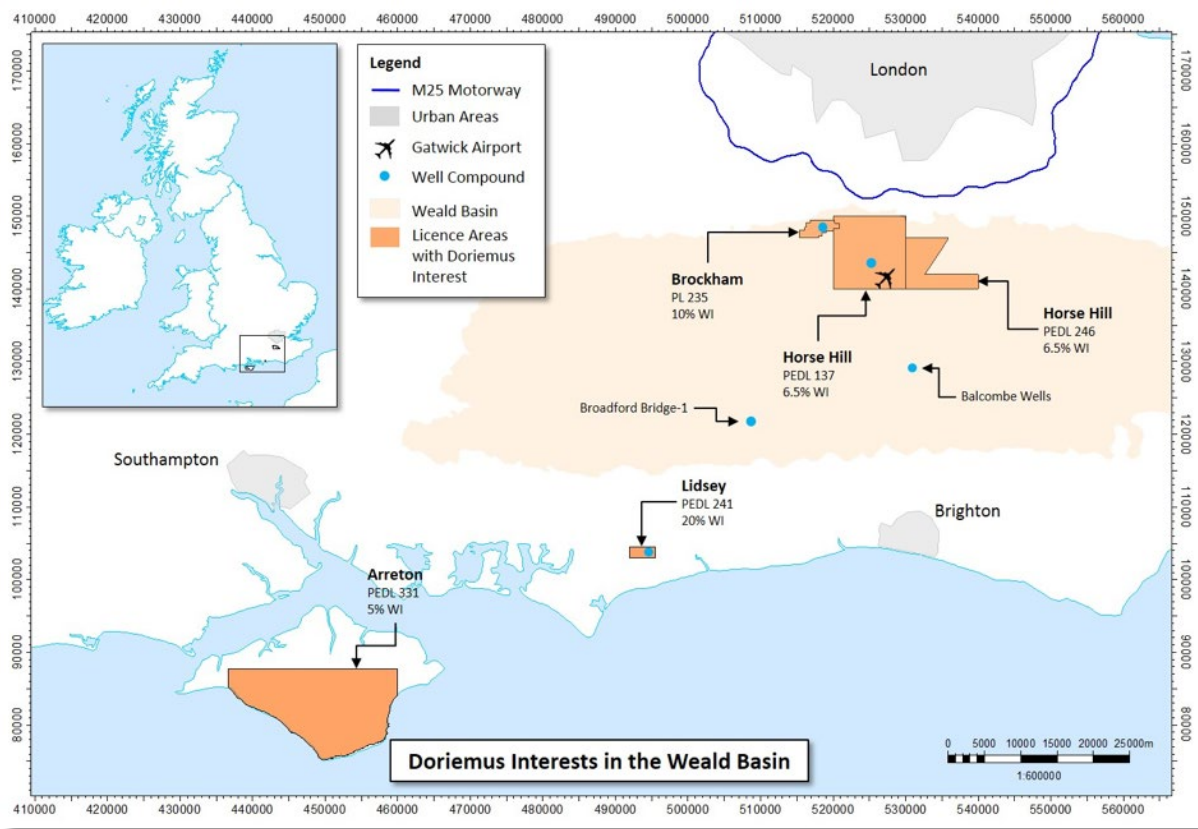

*"We are pleased that the long-term flow testing of the Kimmeridge layers has now finally commenced at Brockham. This work has been a long time coming. There is now obviously a great deal of local and UK attention on the visible activities associated with work on site at Brockham, and Doriemus sees it as totally prudent that the Operator publicly flag its intention to temporarily stop flow testing over the Christmas and New Year break. An unannounced lack of activity at Brockham over this holiday period may indeed cause unnecessary concerns as to the programme underway."*

### About the Brockham Oil Field and Doriemus Plc's Interest:

The Brockham Licence is 8.9km<sup>2</sup> in size and located in the northern portion of the onshore UK Weald Basin in Surrey south of London and 10km north-west of London's Gatwick International Airport (Figure 1).

Doriemus owns a 10% direct interest in the Brockham Oil Field which is held under UK Production Licence PL235. The Field is operated by Angus Energy Plc.
